

Activities for Infants 1–4 Months Old

<p>Talk softly to your baby when feeding him, changing his diapers, and holding him. He may not understand every word, but he will know your voice and be comforted by it.</p>	<p>When you see your baby responding to your voice, praise and cuddle her. Talk back to her and see if she responds again.</p>	<p>Take turns with your baby when he makes cooing and gurgling sounds. Have a "conversation" back and forth with simple sounds that he can make.</p>	<p>Sing to your baby (even if you don't do it well). Repetition of songs and lullabies helps your baby to learn and listen.</p>	<p>With your baby securely in your arms or in a front pack, gently swing and sway to music that you are singing or playing on the radio.</p>
<p>Place a shatterproof mirror close to your baby where she can see it. Start talking, and tap the mirror to get her to look. The mirror will provide visual stimulation. Eventually your baby will understand her reflection.</p>	<p>Rock your baby gently in your arms and sing "Rock-a-bye Baby" or another lullaby. Sing your lullaby and swing your baby to the gentle rhythm.</p>	<p>Put a puppet or small sock on your finger. Say your baby's name while moving the puppet or sock up and down. See whether he follows the movement. Now move your finger in a circle. Each time your baby is able to follow the puppet, try a new movement.</p>	<p>With your baby on her back, hold a brightly colored stuffed animal above her head, in her line of vision. See if she watches the stuffed animal as you move it slowly back and forth.</p>	<p>Make sure your baby is positioned so that you can touch his feet. Gently play with his toes and feet, tickling lightly. Add the "This Little Piggy Went to Market" rhyme, touching a different toe with each verse.</p>
<p>Rest your baby, tummy down, on your arm, with your hand on her chest. Use your other hand to secure your baby—support her head and neck. Gently swing her back and forth. As she gets older, walk around to give her different views.</p>	<p>Hold your baby in your lap and softly shake a rattle on one side of his head, then the other side. Shake slowly at first, then faster. Your baby will search for the noise with his eyes.</p>	<p>Place your baby on her tummy with head to one side, on a blanket/towel on carpeted floor. Lie next to her to provide encouragement. Until she has the strength, have her spend equal time facing left and right. Make "tummy time" a little longer each day. Closely watch your baby in case she rests her face on the floor, which could restrict breathing. As her strength grows, she will be able to lift her head and push up on her arms, leading to rolling and crawling.</p>	<p>Lay your baby on his back and touch his arms and legs in different places. Make a "whooping" sound with each touch. Your baby may smile and anticipate the next touch by watching your hand. When you make each sound, you can also name the part of the body you touch.</p>	<p>In nice weather, take your baby on a nature walk through a park or neighborhood. Talk about everything you see. Even though she might not understand everything, she will like being outside and hearing your voice.</p>
<p>Read simple books to your baby. Even if he does not understand the story, he will enjoy being close and listening to you read.</p>	<p>With white paper and a black marker, create several easy-to-recognize images on each piece of paper. Start with simple patterns (diagonal stripes, bull's eyes, checkerboards, triangles). Place the pictures so that your baby can see them (8"–12" inches from her face). Tape these pictures next to her car seat or crib.</p>	<p>Lay your baby on his back on a soft, flat surface such as a bed or a blanket. Gently tap or rub your baby's hands and fingers while singing "Pat-a-Cake" or another nursery rhyme.</p>	<p>Gently shake a rattle or another baby toy that makes a noise. Put it in your baby's hand. See if she takes it, even for a brief moment.</p>	<p>Hold your baby closely, or lay him down on a soft, flat surface. Be close enough (8"–12") so that he can see you. Face to face, start with small movements (stick out your tongue, open your mouth with a wide grin). If you are patient, your baby may try to imitate you. As he gets older, you can try larger body movements with your head, hands, and arms. You can also try to imitate your baby.</p>
